

# Table of Contents

<b>Preface</b> .....	<b>v</b>
<b>Part I An Introduction to Teaching Mathematical Modeling</b> .....	<b>1</b>
Chapter 1. What Is Mathematical Modeling?.....	3
Chapter 2. Practices and Perspectives in Mathematical Modeling .....	11
Chapter 3. Empowering Students through Action-Focused Critical Thinking.....	23
Chapter 4. Building a Classroom Community to Support Mathematical Modeling.....	31
Chapter 5. A Framework for Teaching Modeling.....	41
<b>Part II The Four Big Ideas in Teaching Mathematical Modeling</b> .....	<b>51</b>
Chapter 6. Big Idea 1: Modeling Begins and Ends outside the Mathematical World .....	53
Chapter 7. Big Idea 2: Modeling Deals with Situations That Are Open and Complex .....	63
Chapter 8. Big Idea 3: Modelers Exercise Judgment .....	75
Chapter 9. Big Idea 4: Modelers Decide When a Solution Is Good Enough.....	85
<b>Part III Including Mathematical Modeling in Your Teaching</b> .....	<b>89</b>
Chapter 10. The Statistics in Mathematical Modeling.....	91
Chapter 11. Mathematical Modeling and the Secondary School Curriculum .....	99
Chapter 12. Uses of Technology to Support Modeling: A Commentary.....	107
Chapter 13. Reflections from the Classroom .....	115
<b>References</b> .....	<b>123</b>
