Acknowledgments	v
Introduction	vii
Denise A. Spangler and Jeffrey J. Wanko	
1. The Nature and Role of Goals in and for Mathematics Instruction	1
Mary Kay Stein and Erin Meikle	
2. Implementing Tasks That Promote Reasoning and Problem Solving: Successes and Obstacles in Making Day-to-Day Mathematics High Level	13
Melissa D. Boston, Kayla Madler, and Christopher Cutone	
3. Representations as Tools for Mathematical Understanding	27
Thomas E. Hodges and Malisa Johnson	
4. Eliciting, Supporting, and Guiding the Math: Three Key Functions of the Teacher’s Role in Facilitating Meaningful Mathematical Discourse	37
Megan Staples and Sherryl King	
5. Repurposing Teacher Questions: Working toward Assessing and Advancing Student Mathematical Understanding	49
Marcy B. Wood and Maggie Hackett	
6. Teaching to Build Procedural Fluency	61
Jennifer M. Bay-Williams and Amy Stokes-Levine	
7. Key Questions to Guide Teachers in Supporting Productive Struggle in Learning Mathematics	73
Blake E. Peterson and Rina Viramontes	
8. Eliciting and Using Evidence of Student Thinking: Giving Students Voice	89
Dana C. Cox, Judy Meicenheimer, and Danette Hickey	
9. Providing Access to Equitable Mathematics Learning	99
Anita A. Wager, Barbara Pietz, and Mary Klehr	
10. “The Right Stuff”: Curriculum to Support the Vision of NCTM and CCSSM	113
Jill Newton and Yvonne Grant	
11. What (Research on) Technology in the Mathematics Classroom Can and Cannot Do	129
Keith R. Leatham and D. Ray Barton	

Contents

12. Using Assessment to Enhance Mathematics Teaching and Learning	141
Chris Suurtamm and Ann Arden	
13. Professionalism: Collaborating on Instruction.....	153
Robert Q. Berry III and Michelle P. Berry
