<b>Foreword</b> by Neale Godfrey .....	vii
<b>Introduction</b> .....	1
CCSS Standards for Mathematical Practice .....	5
Aligning Chapters to the Common Core State Standards for Mathematics .....	5
2015 Jump\$tart Standards for Personal Finance Education .....	6
Aligning Chapters to the Jump\$tart Financial Literacy Standards .....	7
 <b>PART 1</b>	
<b>Ratios and Proportional Relationships and the Number System</b> .....	9
 <b>Chapter 1</b>	
<b>What Will You Net? Determining Your Take-Home Pay</b> .....	11
Students examine the deductions on a pay stub to determine net pay. They then consider different careers, their likely incomes, and what net pay could be expected from them.— <b>GRADE LEVEL: 6</b>	
 <b>Chapter 2</b>	
<b>Planning for College: Tuition, Books, Board, and More</b> .....	19
After selecting a possible career and considering its income, students look at the costs of different types of colleges and create a plan to pay college expenses.— <b>GRADE LEVEL: 6</b>	
 <b>Chapter 3</b>	
<b>Avoiding a Credit Card Catastrophe</b> .....	27
A case study about a college student’s credit card usage leads to an exploration of interest rates, simple vs. compound interest, and the cost of not paying off a credit card debt.— <b>GRADE LEVEL: 6 and 7</b>	
 <b>Chapter 4</b>	
<b>How to Double Your Money, and Other Investment Insights</b> .....	33
Students examine the effects of compound interest and discover the “Rule of 72.”— <b>GRADE LEVEL: 7</b>	
 <b>Chapter 5</b>	
<b>Debunking the Deception of Double Discounts</b> .....	41
An investigation into what’s really going on when a percent discount is applied on top of another discount helps students to be better consumers.— <b>GRADE LEVEL: 7</b>	

## PART 2

### Expressions, Equations, and Functions ..... 47

#### Chapter 6

##### Pawnshop Prowess ..... 49

A pawnshop exercise explores how to calculate simple interest and the pros and cons of taking out short-term loans.—**GRADE LEVEL: 6–8**

#### Chapter 7

##### Budget Sense: Managing the Income and Outflow of Money ..... 55

Students use variables and expressions to describe financial relationships, and they create budgets for various personal and career situations.—**GRADE LEVEL: 6 and 7**

#### Chapter 8

##### How Much Will You Save? Strategies for Percent Discounts ..... 63

After learning about approaches for figuring discounts and how to represent them with symbols, students apply these strategies on an imagined trip to the mall.—**GRADE LEVEL: 6 and 7**

#### Chapter 9

##### Which Car Is the Better Deal? ..... 69

As students explore the expense of owning a car, they write systems of equations and analyze them across representations.—**GRADE LEVEL: 8**

## PART 3

### Statistics and Probability ..... 75

#### Chapter 10

##### Help Wanted: Calling All Middle Schoolers! ..... 77

Students analyze data and then prepare data representations about the jobs that are open to middle school students.—**GRADE LEVEL: 6**

#### Chapter 11

##### Show Me the Money! Determining How Much You Can Make ..... 85

In an extension of the previous chapter, students analyze how much money they might make in various jobs and then prepare graphical representations and calculate statistical measures to describe the data.—**GRADE LEVEL: 6**

#### Chapter 12

##### Gas Prices around the World ..... 91

Students investigate how the price of gas varies in different countries as they create graphical representations and analyze data.—**GRADE LEVEL: 6**

**Chapter 13**

<b>Be Sure to Insure: Exploring the Chance of Car Damage</b> .....	97
--	----

After exploring the chance of two events occurring, students use a probability model to consider the likelihood of an accident and the consequences of lacking insurance.—**GRADE LEVEL: 7**

**Chapter 14**

<b>Only Time Will Tell: How Much Will You Pay for Gas?</b> .....	105
--	-----

Students graph gas prices over time to see trends in prices and to predict what the price will be when they turn sixteen.—**GRADE LEVEL: 8**

**Appendix**

<b>Financial Literacy Resources</b> .....	113
---	-----
