Preface	vii
Acknowledgments	ix
Introduction.....	1
How U.S. Students Are Performing in Mathematics	3
Performance of U.S. Students over Time.....	3
Performance of U.S. Students vs. Their International Peers.....	4
Why Common Core State Standards for Mathematics?.....	7
A Shared Vision.....	8
Interpreting the Common Core State Standards.....	10
Prekindergarten–Grade 8.....	10
Grades 9–12.....	11
Emphasizing Mathematical Practices and Processes	14
CCSSM’s View of Mathematical Practices.....	14
NCTM’s Longstanding Emphasis on Process	15
A Comparison of the CCSSM and NCTM Approaches to Process	16
The Six NCTM Principles: The Foundation of a High-Quality Mathematics Program	19
Achieving Equity	20
Focusing the Curriculum and Making It Coherent	21
Ensuring High-Quality Teaching	22
Enriching Learning	25
Assessing Appropriately.....	26
Teaching with Technology.....	28

Contents

Examples of High-Quality Mathematics Classrooms.....	29
Elementary School Classroom Example.....	29
Middle School Classroom Example	30
High School Classroom Example	32
Elements of High-Quality Classrooms	34
What are students doing?	34
What is the teacher doing?	35
Putting the NCTM Principles into Action in Your School	37
How Administrators Can Support the Principles	37
Observing and Evaluating a Mathematics Classroom.....	39
Developing and Supporting Professional Development	41
Goals of mathematics professional development.....	41
Features that support professional development goals.....	43
Supporting New Teachers.....	44
Why Family Involvement Is Important.....	46
What Information and Resources Should Be Communicated to Families?	46
Ways to Communicate with Families	47
Conclusion	48
Frequently Asked Questions	49
Are the traditional basics still important?	49
How should students be grouped?	49
What is the role of practice, drill, and homework in mathematics instruction?.....	50
What are the appropriate uses of manipulatives in the mathematics classroom?.....	51
Will calculators and other technology hurt students' computational skills?	51
Should elementary schools use mathematics specialists?	51

Contents

Should schools invest in mathematics instructional coaches?	52
Where can research be found to support effective mathematics instruction?	52
How can ELL students be supported in learning mathematics?	53
What are effective strategies for teaching students with difficulties in mathematics?.....	54
What should be used for mathematics intervention, or RtI?.....	55
What are effective strategies to motivate students to learn mathematics?	56
Additional Resources	57
CCSSM Resources	57
Leadership Resources.....	57
High School Reasoning and Sense Making Resources.....	58
Curriculum Resources	58
Diversity, Intervention, and Differentiation Resources	59
Professional Development Resources	59
Mathematical Discourse Resources.....	59
Early Childhood Resources.....	60
Appendix A: Interpretation Charts	61
Interpretation Charts for Prekindergarten–Grade 8.....	61
Sample Interpretation Chart for High School	87
Appendix B: Mathematical Practices and Processes Chart.....	92
References	99
