

Contents

Foreword vii

Preface..... ix

Introduction..... 1

 Pedagogical Content Knowledge 1

 Model of Teacher Knowledge 2

 Characteristics of Tasks..... 7

 Types of Questions 8

 Conclusion..... 10

Chapter 1

Geometric Measurement..... 11

 Working toward Big Idea 1, Essential Understanding 1*a*, and Big Idea 4..... 13

 Interpreting units of length and units of area 15

 Finding perimeter and area, given dimensions 17

 Determining the relationship between perimeter and area..... 20

 Attending to justification (Big Idea 4) 28

 Extending and assessing students’ understanding of perimeter and area relationships 29

 Extending understanding to three-dimensional measures..... 33

 Summarizing Pedagogical Content Knowledge to Support Big Idea 1, Essential Understanding 1*a*, and Big Idea 4 38

 Knowledge of learners 38

 Knowledge of curriculum..... 39

 Knowledge of instructional strategies 41

 Knowledge of assessment..... 42

 Conclusion..... 43

Chapter 2

Transformations..... 45

 Working toward Big Idea 3 and Essential Understanding 3*b* 49

 Sequencing problems to build understanding of reflections..... 50

 Working with rotations, translations, and dilations 66

Summarizing Pedagogical Content Knowledge to Support Big Idea 3 and Essential Understanding 3 <i>b</i>	74
Knowledge of learners	74
Knowledge of curriculum.....	75
Knowledge of instructional strategies	75
Knowledge of assessment.....	76
Conclusion.....	76
Chapter 3	
Looking Back and Looking Ahead with Geometry.....	77
Building Foundations: Geometry in Grades 3–5	77
Extending Understanding: Geometry in Grades 9–12.....	82
Appendix 1	
The Big Ideas and Essential Understandings for Geometry.....	97
Appendix 2	
Resources for Teachers.....	99
Appendix 3	
Tasks	105
Creating Rectangles with a Given Area or Perimeter	106
Working with a Nonuniform Shape: The Leaf Task	107
Finding the Nets of a Cube	108
Conjecturing about the Relationship between the Volumes of Two Cubes.....	109
Investigating Nets: Open Box vs. Cube	110
Reflecting Three Given Objects.....	111
Focusing on the Points in a Rotation	112
Identifying the Center of a Rotation	113
Reasoning about Similar Triangles.....	114
Making Sense of Ratios in a Dilation	115
References.....	117

Appendix 1

The Big Ideas and Essential Understandings for GeometryX

Appendix 2

Resources for Teachers

Appendix 3

Tasks

Creating Rectangles with a Given Area or Perimeter

Working with a Nonuniform Shape: The Leaf Task

Finding the Nets of a Cube

Conjecturing about the Relationship between the Volumes of Two Cubes

Investigating Nets: Open Box vs. Cube

Reflecting Three Given Objects

Focusing on the Points in a Rotation

Identifying the Center of a Rotation

Reasoning about Similar Triangles

Making Sense of Ratios in a Dilation
