Foreword	v
Preface	vii
Introduction	1
Why Algebraic Thinking?	1
Understanding Algebraic Thinking	2
Big Ideas and Essential Understandings	3
Benefits for Teaching, Learning, and Assessing	4
Ready to Begin	5
Chapter 1	7
Early Algebra: The Big Ideas and Essential Understandings	
Characterizing Early Algebra	8
Identifying Algebra Content for Elementary Teachers	11
The Big Ideas and Essential Understandings	12
Arithmetic as a Context for Algebraic Thinking: Big Idea 1	15
The fundamental properties	15
Algebra and the fundamental properties	17
Using computation to deepen algebraic understanding	19
Decomposing quantities as a foundation for algebra	20
Other arithmetic opportunities for developing generalizations	21
Equations as Statements of the Equivalence of Two Quantities: Big Idea 2 ..	25
A relational understanding of the equals sign	25
Reasoning about equations	26
Using equations to model problem situations	30
Variables as Versatile Tools: Big Idea 3	32
The different meanings of <i>variable</i>	32
Understanding what variables represent	36
Using repeated or different variables	37
The role of variable in a specific context	37
Variables as representing discrete or continuous quantities	37
Using Quantitative Reasoning to Generalize Relationships: Big Idea 4	39
How two quantities relate to each other	39
Reasoning about multiple quantities	42
Functional Thinking as a Path into Algebra: Big Idea 5	47
A function as a relationship between two sets	48
A covariational perspective	50
The nature of variables in a function	51
Different types of relationships in a function	51

Different representations of functions.....	55
Analyzing change to understand function behavior.....	59
Conclusion.....	64
Chapter 2.....	67
Connections: Looking Back and Ahead in Learning	
Developing the Symbolic Language of Algebra	67
Generalizing Arithmetic	72
Building Relational Thinking and Quantitative Reasoning	73
Developing Ideas about Functions.....	77
Conclusion.....	79
Chapter 3.....	81
Challenges: Learning, Teaching, and Assessing	
Practices That Support Algebraic Thinking.....	81
Focusing on mathematical processes.....	82
Selecting appropriate tasks and assessments	90
Assessing Algebraic Thinking	93
Learning to Think Algebraically.....	94
Conclusion.....	97
References	99
