Preface to Curriculum Focal Points for Prekindergarten through Grade 8 Mathematics	viii
---	-------------

Acknowledgments	ix
------------------------------	-----------

1. Introduction	1
------------------------------	----------

Purpose of This Guide.....	1
Special aspects of kindergarten mathematics for all students	1
Learning Similarities across Number and Operations, Geometry, and Measurement	2
The Need for Focused Mathematics Teaching Time in Kindergarten.....	3
Effective Teaching-Learning Practices	4
Organization of This Book.....	7

2. Number and Operations.....	9
--------------------------------------	----------

Overview of Number and Operations	9
The Number Core: 2s/3s and 4s/Pre-Ks	9
Sees cardinality of small groups and of small groups within a group.....	13
Says number-word list accurately to thirty-nine.....	17
Counting: one-to-one correspondences: coordinating objects in space and number words said in time	20
Written number symbols.....	22
The Number Core: Kindergarten	23
Overview	23
A cardinal-counting advance: seeing and making ten and some ones for a teen number	23
The number-word list	27
Written number symbols.....	28
Written work for triads to ten and for teens.....	29
The Number Core: Grades 1 and 2	29
The Relations (More Than/Less Than) Core.....	30
Overview for 2s/3s and 4s/pre-Ks	30
Relations on two numbers ≤ 5 : more than, equal to, less than for 2s/3s	30
Relations on two numbers ≤ 5 : more than, equal to, less than for 4s/pre-Ks.....	31
Relations: more than, equal to, less than for ks.....	34
The Operations (Addition and Subtraction) Core	35
Overview.....	35
Number lines are not appropriate for 2s/3s/, 4s/pre-Ks, Ks, or grade 1 children.....	38
The operations core (addition and subtraction) for 2s/3s.....	40
The operations core (addition and subtraction) for 4s/pre-Ks.....	42
The operations core (addition and subtraction) for ks.....	45

Contents — Continued

3. Geometry, Spatial Reasoning, and Measurement.....	57
Geometry.....	57
Shape and Structure.....	59
Spatial Relations	65
Compositions and Decompositions in Space.....	67
Measurement.....	70
Length.....	71
Area.....	72
Volume	73
Geometry, Spatial Reasoning, and Measurement: Final Words.....	74
 4. Mathematizing: Solving Problems, Reasoning, and Communicating, Connecting, and Representing Ideas in Kindergarten	 77
 References.....	 79
