

# Contents

Foreword.....	v
Preface .....	vii
Introduction.....	1
Why Geometry and Measurement? .....	1
Understanding Geometry and Measurement .....	2
Big Ideas and Essential Understandings .....	3
Benefits for Teaching, Learning, and Assessing .....	4
Ready to Begin .....	5
Chapter 1 .....	7
Geometry and Measurement: The Big Idea and Essential Understandings	
Identifying the Big Ideas and Essential Understandings .....	7
Transforming Spaces and Objects: Big Idea 1.....	11
Transformations for analyzing and describing .....	11
Transformations for measuring .....	29
Measuring Attributes: Big Idea 2 .....	33
Coordination of unit and number.....	33
Coordination of scales .....	36
Generating attributes through motion.....	38
Composition and decomposition.....	41
Classifying Properties of Objects: Big Idea 3.....	47
Classification schemes and definition .....	48
Relationships between classes .....	50
Classification and investigation.....	53
Conclusion .....	59
Chapter 2 .....	61
Connections: Looking Back and Ahead in Learning	
Measurement in Support of Other Mathematical Ideas .....	61
Measurement and Arithmetic.....	62
Addition as joining or continuing measures .....	62
Subtraction as comparing measures.....	64
Multiplication as measuring: Three meanings.....	66
Division as remeasuring one length by another.....	72
Conclusion .....	73

Chapter 3 .....	75
Challenges: Learning, Teaching, and Assessing	
Building Definitions and Using Counterexamples .....	76
Introducing and Working with Reflection Symmetry .....	77
Making Conjectures .....	79
Using reflection symmetry in classifying .....	80
Using symmetry in exploring conjectures .....	81
Arguing, Refuting, Explaining, Generalizing .....	82
Finding lines of reflection symmetry .....	83
Reasoning and explaining why things are as they are .....	84
Proving by Systematic Search .....	85
Conclusion .....	86
References .....	89
