<b><i>Catalyzing Change in High School Mathematics</i> Task Force and Writing Team . . . . .</b>	<b>vii</b>
--	------------

<b>Acknowledgments . . . . .</b>	<b>ix</b>
----------------------------------	-----------

<b>Preface: The Purpose of <i>Catalyzing Change</i>. . . . .</b>	<b>xi</b>
--	-----------

<b>Introduction. . . . .</b>	<b>1</b>
------------------------------	----------

The Stability of High School Mathematics . . . . .	1
The Need to Catalyze Change in High School Mathematics . . . . .	2
High School and Postsecondary Mathematics. . . . .	4
Focusing the High School Mathematics Curriculum . . . . .	5
Initiating Critical Conversations . . . . .	6
Key Recommendations . . . . .	7

<b>The Purposes of School Mathematics . . . . .</b>	<b>9</b>
---	----------

Expand Professional Opportunity . . . . .	10
Understand and Critique the World . . . . .	11
Experience Wonder, Joy, and Beauty . . . . .	12
The Power of Multiple Purposes . . . . .	12

<b>Creating Equitable Structures . . . . .</b>	<b>15</b>
--	-----------

Student Tracking . . . . .	16
Distinguishing Tracking from Appropriate Acceleration . . . . .	19
Teacher Tracking . . . . .	21
Supporting Student Success in High School Mathematics . . . . .	22

<b>Implementing Equitable Instruction</b> .....	25
Developing a Positive Mathematical Identity .....	28
Developing Mathematical Agency .....	28
Equitable Mathematics Teaching Practices .....	29
Collaborating to Support Effective Mathematics Teaching Practices ....	35
 <b>Essential Concepts in High School Mathematics</b> .....	37
Developing Mathematical Practices and Processes .....	38
Reasoning and Proof and the Cycle of Inquiry and Justification .....	39
Mathematical Modeling and the Modeling Cycle .....	40
Technology as a Driver of Change in Student Engagement .....	41
Developing Essential Concepts .....	42
Essential Concepts in Number .....	44
Essential Concepts in Algebra and Functions .....	45
Focus 1: Algebra .....	46
Focus 2: Connecting Algebra to Functions .....	50
Focus 3: Functions .....	53
Essential Concepts in Statistics and Probability .....	56
Focus 1: Quantitative Literacy .....	57
Focus 2: Visualizing and Summarizing Data .....	58
Focus 3: Statistical Inference .....	61
Focus 4: Probability .....	64
Essential Concepts in Geometry and Measurement .....	67
Focus 1: Measurement .....	68
Focus 2: Transformations .....	69
Focus 3: Geometric Arguments, Reasoning, and Proof .....	76
Focus 4: Solving Applied Problems and Modeling in Geometry .....	79
 <b>Organizing High School Mathematics</b> .....	83
What Should Count as a Mathematics Course .....	84

Attaining the Essential Concepts . . . . .	85
Pathway A—Geometry First . . . . .	86
Pathway B—Integrated Approach . . . . .	87
Possible Course Options beyond the Essential Concepts . . . . .	88
Organizing Pathways for Student Success . . . . .	88
<b>Catalyzing Change: Next Steps . . . . .</b>	<b>91</b>
Key Recommendations Restated . . . . .	91
Actions for Teachers, Schools, and Districts . . . . .	91
Actions for Policymakers . . . . .	92
Actions for Postsecondary Educators . . . . .	92
Actions for NCTM . . . . .	93
<b>Conclusion . . . . .</b>	<b>93</b>
<b>References . . . . .</b>	<b>95</b>
