To Light Their Path

Mathematics is an uncharted sea to so many pupils. Make it easier for them to steer a straight course by using these practical instruments.

ALGEBRA IN EASY STEPS

By Edwin I. Stein. The basal algebra which provides just the right practice for each pupil—slow, average, or advanced. Much used for Veterans' Courses. Paper, \$1.08; cloth, \$1.60.*

ALGEBRA, AN INTERESTING LANGUAGE

By Breslich. A supplementary book, informal in approach, with full-page photographs and sketches on every page to show the actual uses of algebra. \$1.00.

DIAGRAMS IN THREE DIMENSIONS FOR SOLID GEOMETRY

By Breslich. A boxed set of 15 three-dimensional diagrams which stand out like actual models when viewed through the accompanying colorscope. \$.80.
