 Pentagrams and Spirals. Nov., 680-87.
 Perimeters, Patterns, and Pi. Apr., 284-88.
 Some Colorful Mathematics. Mar., 307-12, 318-20.
 Starting a Euclid Club. May, 386-88.
 Technology and Reasoning in Algebra and Geometry. Feb., 138-42.
 Theorems in Motion: Using Dynamic Geometry to Gain Fresh Insights. Apr., 330-32.
 Trap a Surprise in an Isosceles Trapezoid. Jan., 12-14.

Where Are We? Sept., 524-34.

History

Products, 612.
 Publications, 172, 174, 437, 514, 609-10, 780, 781, 782.
 Why Were So Few Mathematicians Female? Oct., 592-96.

Manipulatives

The Incredible Three-by-Five Card! Feb., 96-98 (see also Oct., 576).

Measurement

Products, 520-21.
 Reader Reflections, 710-11.
 Where Are We? Sept., 524-34.

Multiculturalism

Products, 612, 696.
 Projects, 77.
 Publications, 171-72, 437, 516.
 Reader Reflections, 291, 306, 576-78.

Number Theory

Products, 783-84.
 Publications, 437, 606, 781.
 Reader Reflections, 3, 26, 83 (see also Sept., 449, 498, Oct., 616), 148, 149, 179, 182, 208, 251, 255, 291 (see also Oct., 544), 368 (see also Oct., 591, 616), 441 (see also Dec., 790-93), 449, 498, 591, 616, 624-25, 725-26, 726-27, 788, 790-93.
 The Case of Trapezoidal Numbers. Jan., 16-24.
 Cryptography: Cracking Codes. Dec., 743-50, 756-57.
 How Many Cards? Let's Ask the LCM. Apr., 298-99, 305.
 Solution or Bused. Apr., 280-82.
 The Square-Patio Problem. Jan., 4-6.
 Using Clock Arithmetic to Send Secret Messages. Feb., 100-4.

President's Message

Building Bridges of Mathematical Understanding for All Children. Sept., 536-39.

Probability

Reader Reflections, 27, 54-55, 194, 711.
 A Bird in the Hand. Nov., 674-77.
 Coin Tossing. Nov., 642-45.
 Representing Probabilities with Pipe Diagram. May, 378-82.

Problem Solving

Calendars, Jan., 39-43 (see also May, 444, Sept., 501-2, 503), Feb., 127-31 (see also May, 444, Sept., 502-3), Mar., 215-17, 226-27 (see also Sept., 503-4), Apr., 313-17 (see also Sept., 504-6, Oct., 620), May, 403-7 (see also Oct., 620, Nov., 704), Sept., 491-96, Oct., 579-82, Nov., 658-66, Dec., 751-55.

Products, 608, 610–11.
 Publications, 360, 362, 512, 514–15, 606, 608, 609, 695–96, 782.
 Reader Reflections, 151–52, 179, 264, 306, 333, 442, 444, 500–6, 618 (see also Dec., 794), 620.
 Active Participation in the Classroom through Creative Problem Generation. May, 383–85.
 Problem Solving: A Method for All Seasons. Oct., 598–601.
 Revisiting and Extending the Hog Game. Dec., 728–33.
 Short-Term Sales Forecasting. Jan., 48–52.
 Two Car-Buying Strategies: An Old Problem Revisited with a New Analysis. Mar., 196–99.

Statistics

Publications, 362, 436, 518.
 Reader Reflections, 291, 578, 591.
 The Advanced Placement Course in Statistics: Increasing Students' Options. May, 376–77.
 Analyzing Data from the Olympic Games for Trends and Inferences. May, 370–72.
 Becoming Flexible with Functions: Investigating United States Population Growth. May, 414–18.
 Class Activities with Student-Generated Data. Feb., 105–7.
 Data Driven Mathematics: A Curriculum Strand for High School Mathematics. Sept., 460–65, 540.
 Experiments from Psychology and Neurology. Oct., 562–69.
 The Final Tally. Nov., 636–39.
 Teaching Statistics with Computer Networks. Jan., 70–72.
 Visual Representations of Mean and Standard Deviation. Nov., 688–92.

Teacher Education

Projects, 437–38, 540.
 Publications, 608–9.
 Reader Reflections, 83, 725.

Technology

Products, 518–19, 520, 784, 786.
 Projects, 362, 364.
 Publications, 172, 258, 606.
 Reader Reflections, 148, 499, 616, 618, 726–27.
 Classroom Technology: Tool for, or Focus of, Learning? Feb., 134–37.
 Coin Tossing. Nov., 642–45.
 Communicating Performance Criteria to Students through Technology. Jan., 66–69.
 A Computer for All Students—Revisited. Dec., 712–14.
 Everybody Talks about It!—Weather Investigations. Feb., 160–65.
 Exploring Parametric Transformations of Functions. Mar., 232–40.

Exploring Quadratic Functions: From a to c . Feb., 144–46.
 Finding Quadratic Equations for Real-Life Situations. Feb., 154–57 (see also Sept., 499).
 Friendly Windows for Graphing Calculators. Sept., 508–11.
 Geometry, Iteration, and Finance. Nov., 646–51.
 The Graphing Calculator and Division of Fractions. Apr., 304–5.
 An Interest in Radioactivity. Mar., 209–14, 228–30.
 Make These Designs. May, 424–27.
 A Mathematical Look at a Free Throw Using Technology. Dec., 774–79.
 Multiple Connections. Nov., 628–34.
 The Pentagon Problem: Geometric Reasoning with Technology. Feb., 86–90.
 Short-Term Sales Forecasting. Jan., 48–52.
 Spreadsheets: Helpful for Understanding Mathematical Structures. Mar., 252–54.
 Stimulating Mathematical Interest with Dynamical Systems. Mar., 242–47.
 Teaching Statistics with Computer Networks. Jan., 70–72.
 Technology and Reasoning in Algebra and Geometry. Feb., 138–42.
 Using Interactive-Geometry Software for Right-Angle Trigonometry. Oct., 602–5.
 Visual Representations of Mean and Standard Deviation. Nov., 688–92.

Technology Reviews

Algebra

Alge-Blaster 3, Windows 3.1 or higher, DOS 5.0 or higher. Feb., 169.
 GrafEq, Version 2.02, Macintosh; IBM compatible, Windows 3.1 or higher. Nov., 694.
 Introducing Dynamic Algebra with NuCalc: Investigating Symbols, Functions and Graphs, Power Macintosh or Macintosh with 68040 processor or FPU. Nov., 694–95.
 Pre-Algebra Topics: Graphing and Polynomials: Measurement; Percents with Applications; Statistics and Consumer Applications, Macintosh, System 6.03 or higher. May, 433–34.
 Toolkit for Interactive Mathematics, IBM compatible 386 or better, Windows 3.1 or higher. Nov., 695.

Applications

Mathville, IBM compatible, DOS 3.0 or higher; Macintosh Single Computer School Edition with HyperCard 1.2 or higher. Feb., 170–71.

Arithmetic

Analyzer, IBM compatible, DOS 3.3 or higher. Feb., 168–69.

Calculus

Animating Calculus: Mathematica Notebooks for the Laboratory, Macintosh. Feb., 168.

Interactive Calculus, IBM compatible, Microsoft Windows 3.1 or Windows 3.0 plus multimedia extensions, 486SX processor. Feb., 169–70.

Probability

Prob Sim, Macintosh. Apr., 359–60.

Statistics

DataScope, Macintosh. Apr., 359.

Tests

Exam in a Can 3, IBM compatible, DOS 5.0 or higher; Macintosh. May, 433.
 Toolkit for Interactive Mathematics, IBM compatible, 386 or higher. Nov., 695.

Tests

Publications, 696, 781.

Trigonometry

Products, 786.
 Publications, 258.
 Reader Reflections, 55, 149–50, 194, 201, 263, 368.
 How High Is the Water Tower? Apr., 274–78 (see also Dec., 710–11).
 Perimeters, Patterns, and Pi. Apr., 284–88.
 Using Interactive-Geometry Software for Right-Angle Trigonometry. Oct., 602–5.

In NCTM Journals

Readers of the *Mathematics Teacher* might enjoy the following articles in the November-December issue of *Mathematics Teaching in the Middle School*:

- "A Teacher's View on Classroom Assessment," De A. Tonack
- "Now and Then: Brokering Money and Mathematics; From a Buttonwood to a Box to a Bear and a Bull," Faye Hilgart
- "Teacher to Teacher: Graphing and Social Studies: An Interdisciplinary Activity," Julia L. Brehm

In the December issue of *Teaching Children Mathematics*:

- "The Whole Town Is Talking about It... 'Math Month,' That Is," Donna DeCasas Szemcsak and Oliver J. West
- "Investigating Flags: A Multicultural Approach," Linda Dolinko
