

Contents

List of Examples	viii
National Council of Teachers of Mathematics High School Curriculum Project	ix
Preface	xi
Background.....	xi
Purpose.....	xi
Organization of the Publication	xii
Acknowledgments	xiii
President’s Letter	xiv
Section 1: Defining Reasoning and Sense Making	1
1 Reasoning and Sense Making	3
What Are Reasoning and Sense Making?.....	4
Why Reasoning and Sense Making?.....	5
How Do We Include Reasoning and Sense Making in the Classroom?	5
Conclusion	7
2 Reasoning Habits.....	9
Progression of Reasoning	10
Developing Reasoning Habits in the Classroom	11
Reasoning as the Foundation of Mathematical Competence.....	12
Statistical Reasoning.....	12
Mathematical Modeling.....	13
Technology to Support Reasoning and Sense Making	14
Conclusion	14
Section 2: Reasoning and Sense Making in the Curriculum	15
3 Reasoning and Sense Making across the Curriculum	17

4	Reasoning with Number and Measurement	21
	Reasonableness of Answers and Measurements	21
	Approximations and Error	25
	Number Systems	27
	Counting.....	29
5	Reasoning with Algebraic Symbols	31
	Meaningful Use of Symbols	31
	Mindful Manipulation.....	33
	Reasoned Solving.....	34
	Connecting Algebra with Geometry	36
	Linking Expressions and Functions	37
6	Reasoning with Functions	41
	Multiple Representations of Functions	41
	Modeling by Using Families of Functions.....	45
	Analyzing the Effects of Parameters.....	51
7	Reasoning with Geometry.....	55
	Conjecturing about Geometric Objects.....	56
	Construction and Evaluation of Geometric Arguments	59
	Multiple Geometric Approaches	62
	Geometric Connections and Modeling	64
8	Reasoning with Statistics and Probability.....	73
	Data Analysis	74
	Modeling Variability	80
	Connecting Statistics and Probability	86
	Interpreting Designed Statistical Studies.....	87

Section 3: Reasoning and Sense Making in the High School Mathematics Program	91
9 Equity	93
Courses.....	93
Student Demographics and Opportunities for Learning	96
High Expectations.....	98
Conclusion	98
10 Coherence	101
Curriculum and Instruction.....	101
Vertical Alignment of Curriculum	102
Assessment.....	104
Conclusion	105
11 Stakeholder Involvement	107
Students.....	107
Families.....	108
Teachers	109
Administrators.....	110
Policymakers.....	110
Higher Education	111
Curriculum Designers	112
Collaboration among Stakeholders.....	112
Conclusion	112
Annotated Bibliography	115
References.....	124

List of Examples

Example 1: Around the World	22
Example 2: Fuel for Thought.....	23
Example 3: Around Pi	25
Example 4: A Model Idea.....	27
Example 5: Horseshoes in Flight.....	32
Example 6: Distribute Thoroughly	33
Example 7: Finding Balance.....	35
Example 8: Squaring It Away	36
Example 9: More Than Meets the Eye	38
Example 10: Patterns, Plane and Symbol.....	42
Example 11: Take As Directed	45
Example 12: Money Matters	49
Example 13: Tidal Waves	52
Example 14: Picture This	57
Example 15: Circling the Points.....	59
Example 16: Taking a Spin.....	62
Example 17: Clearing the Bridge	64
Example 18: Assigning Frequencies	70
Example 19: Meaningful Words, Part A.....	74
Example 20: What Are the Chances? Part A	81
Example 21: What Are the Chances? Part B.....	86
Example 22: Meaningful Words, Part B	87
