

# CONTENTS

iv

Preface .....	vii
How to Use This Book.....	x
<b>NUMBER AND QUANTITY</b>	
<b>The Real Number System .....</b>	<b>1</b>
Extend the properties of exponents to rational exponents.....	1
<b>Quantities .....</b>	<b>1</b>
Reason quantitatively and use units to solve problems.....	1
<b>The Complex Number System .....</b>	<b>2</b>
Perform arithmetic operations with complex numbers .....	2
<b>Vector and Matrix Quantities.....</b>	<b>3</b>
Represent and model with vector quantities .....	3
Perform operations on matrices and use matrices in applications.....	3
<b>ALGEBRA</b>	
<b>Seeing Structure in Expressions .....</b>	<b>6</b>
Interpret the structure of expressions.....	6
Write expressions in equivalent forms to solve problems .....	9
<b>Arithmetic with Polynomials and Rational Expressions.....</b>	<b>11</b>
Perform arithmetic operations on polynomials.....	11
Use polynomial identities to solve problems.....	12

<b>Creating Equations .....</b>	<b>13</b>
Create equations that describe numbers or relationships.....	13
<b>Reasoning with Equations and Inequalities .....</b>	<b>16</b>
Understanding solving equations as a process of reasoning and explain the reasoning.....	16
Solve equations and inequalities in one variable.....	19
Solve systems of equations .....	21
Represent and solve equations and inequalities graphically .....	23
<b>FUNCTIONS</b>	
<b>Interpreting Functions.....</b>	<b>24</b>
Understand the concept of a function and use function notation .....	24
Interpret functions that arise in applications in terms of the context .....	28
Analyze functions using different representations .....	33
<b>Building Functions.....</b>	<b>38</b>
Build a function that models a relationship between two quantities.....	38
Build new functions from existing functions .....	41
<b>Linear, Quadratic, and Exponential Models.....</b>	<b>43</b>
Construct and compare linear and exponential models and solve problems .....	43

Interpret expressions for functions in terms of the situation they model .....	46
<b>Trigonometric Functions .....</b>	<b>47</b>
Extend the domain of trigonometric functions using the unit circle .....	47
Model periodic phenomena with trigonometric functions .....	49
Prove and apply trigonometric identities.....	50
<b>GEOMETRY</b>	
<b>Congruence .....</b>	<b>51</b>
Experiment with transformations in the plane .....	51
Understand congruence in terms of rigid motions.....	53
Prove geometric theorems .....	55
Make geometric constructions .....	62
<b>Similarity, Right Triangles, and Trigonometry .....</b>	<b>63</b>
Understand similarity in terms of similarity transformations.....	63
Prove theorems involving similarity .....	64
Apply trigonometry to general triangles .....	65
<b>Circles .....</b>	<b>66</b>
Understand and apply theorems about circles .....	66
Find arc lengths and areas of sectors of circles.....	67
<b>Expressing Geometric Properties with Equations .....</b>	<b>68</b>
Translate between the geometric description and the equation for a conic section.....	68
Use coordinates to prove simple geometric theorems algebraically .....	71
<b>Geometric Measurement and Dimension .....</b>	<b>72</b>
Explain volume formulas and use them to solve problems .....	72
Visualize relationships between two-dimensional and three-dimensional objects.....	73
<b>Modeling with Geometry.....</b>	<b>74</b>
Apply geometric concepts in modeling situations .....	74
<b>STATISTICS AND PROBABILITY</b>	
<b>Interpreting Categorical and Quantitative Data .....</b>	<b>78</b>
Summarize, represent, and interpret data on a single count or measurable variable .....	78
Summarize, represent, or interpret data on two categorical and quantitative variables .....	82
Interpret linear models.....	89
<b>Making Inferences and Justifying Conclusions .....</b>	<b>90</b>
Understand and evaluate random processes underlying statistical experiments.....	90
Make inferences and justify conclusions from sample surveys, experiments, and observational studies .....	92

## **Conditional Probability and the Rules of Probability ..... 93**

Understand independence and conditional probability and  
use them to interpret data ..... 93

Use the rules of probability to compute probabilities of  
compound events in a uniform probability model ..... 96

## **Using Probability to Make Decisions ..... 100**

Calculate expected values and use them to solve  
problems ..... 100
