Preface.....	viii
Preface to Curriculum Focal Points for Prekindergarten through Grade 8 Mathematics.....	ix
Acknowledgments	x
1. Introduction.....	1
Purpose of This Guide	1
Purpose of Curriculum Focal Points	1
Impact of Focal Points on Curriculum, Instruction, and Assessment	2
Using This <i>Focus in Grade 3</i> Book.....	2
Bringing Focus into the Classroom: Instruction That Builds Understanding and Fluency.....	3
An instructional progression approach	3
In-depth instructional conversations	4
Using mathematical drawings	4
An Important Grade 3 Issue: Developing Fluency in Basic Multiplication and Division Facts	4
2. Focusing on Multiplication and Division	7
Instructional Progression for Multiplication and Division	7
Early Foundations in Multiplication	7
Building Depth of Understanding in Multiplication and Division	9
Meaning of multiplication.....	9
Strategies for learning multiplication and division facts.....	11
Strengthening understanding of multiplication through problem solving.....	15
Using models to connect multiplication and division.....	16
Using language to connect multiplication and division	18

Contents

Using strategies to connect multiplication and division	19
Strengthening understanding of division through problem solving	19
Strengthening Fluency in Multiplication and Division through Connections	21
Connections in later grades	23
Developing Depth of Understanding	23
3. Focusing on Fractions	25
Instructional Progression for Fractions	25
Early Foundations in Fractions.....	25
Introducing and Building Fraction Concepts	30
Using area models to represent a fraction as a part of a whole	30
Using linear models to represent a fraction as a part of a whole.....	32
Understanding the size of fractional parts of a whole.....	35
Using groups of objects to model a fraction as a part of a set.....	37
Using language to develop fraction fluency	38
Representing fractions that are equal to, less than, or greater than 1.....	39
Equivalent fractions.....	41
Comparing and ordering fractions	43
Strengthening Fluency through Connections	47
Connections in later grades	48
Building Depth of Understanding.....	48
4. Focusing on Two-Dimensional Shapes	49
Instructional Progression for Two-Dimensional Shapes	49
Early Foundations in Geometry.....	49
Building Understanding of Two-Dimensional Shapes.....	55
Using formal geometric language.....	55
Classifying polygons.....	56

Contents

Classifying triangles and quadrilaterals	58
Applications of combining and decomposing polygons	60
Exploring congruence	63
Exploring line symmetry.....	63
Strengthening Fluency through Connections.....	65
Connections in later grades	66
Developing Depth of Understanding	67
References	68
