

Contents

Preface	xi
I. Expanding Visions of Geometry	1
1. What Is Geometry?	3
Joseph Malkevitch	
<i>City College of New York—York College, Jamaica, New York</i>	
2. Enumerating Symmetry Types of Rectangle and Frieze Patterns: How Sherlock Might Have Done It.....	17
Doris Schattschneider	
<i>Moravian College (Emerita), Bethlehem, Pennsylvania</i>	
3. Möbius Concepts: Strips and Tori.....	33
Yuichi Handa	
<i>California State University—Chico, Chico, California</i>	
David A. James	
<i>University of Michigan—Dearborn, Dearborn, Michigan</i>	
Thomas Mattman	
<i>California State University—Chico, Chico, California</i>	
4. Exploring Curvature with Paper Models	49
Howard T. Iseri	
<i>Mansfield University of Pennsylvania, Mansfield, Pennsylvania</i>	
5. Prairie Plants: Exploring Fractals in Nature	63
Dane Camp	
<i>New Trier Township High School—Winnetka Campus, Winnetka, Illinois</i>	
Erich Hauenstein	
<i>College of DuPage, Glen Ellyn, Illinois</i>	
6. Folding Polygons to Convex Polyhedra	77
Joseph O'Rourke	
<i>Smith College, Northampton, Massachusetts</i>	
II. Learning Geometry	89
7. Highlights of Research on Learning School Geometry	91
Michael T. Battista	
<i>Ohio State University, Columbus, Ohio</i>	

8. Prototypes and Categorical Reasoning: A Perspective to Explain How Children Learn about Interactive Geometry Objects	109
Paul Yu	
<i>Grand Valley State University, Allendale, Michigan</i>	
Jeffrey Barrett	
<i>Illinois State University, Normal, Illinois</i>	
Norma Presmeg	
<i>Illinois State University, Normal, Illinois</i>	
9. Conceptions of Angle: Implications for Middle School Mathematics and Beyond.....	127
Christine Browning	
<i>Western Michigan University, Kalamazoo, Michigan</i>	
Gina Garza-Kling	
<i>Western Michigan University, Kalamazoo, Michigan</i>	
10. Developing the Spatial Operational Capacity of Young Children Using Wooden Cubes and Dynamic Simulation Software	141
Jacqueline Sack	
<i>Rice University, Houston, Texas</i>	
Retha van Niekerk	
<i>University of the Witwatersrand, Johannesburg, Johannesburg, South Africa</i>	
11. Fostering Geometric Thinking in the Middle Grades: Professional Development for Teachers in Grades 5–10	155
Mark Driscoll	
<i>Education Development Center, Inc., Newton, Massachusetts</i>	
Michael Egan	
<i>Augustana College, Rock Island, Illinois</i>	
Rachel Wing DiMatteo	
<i>Education Development Center, Inc., Newton, Massachusetts</i>	
Johannah Nikula	
<i>Education Development Center, Inc., Newton, Massachusetts</i>	

III. Teaching Geometry for Understanding 173

12. Teaching Geometry for Conceptual Understanding: One Teacher's Perspective 175
James Paniati
Northwest Regional High School, Winsted, Connecticut
13. Defining in Geometry 189
Michael de Villiers
University of KwaZulu-Natal, South Africa
Rajendran Govender
University of Western Cape, South Africa
Nikita Patterson
Kennesaw State University, Kennesaw, Georgia
14. Advancing Students' Understanding of Quadrilaterals 205
Tutita M. Casa
University of Connecticut, Storrs, Connecticut
M. Katherine Gavin
University of Connecticut, Storrs, Connecticut
15. Using Interactive Geometry Software to Teach Secondary School Geometry: Implications from Research 221
Karen F. Hollebrands
North Carolina State University, Raleigh, North Carolina
Ryan C. Smith
North Carolina State University, Raleigh, North Carolina
16. Representing, Modeling, and Solving Problems in Interactive Geometry Environments 233
José N. Contreras
University of Southern Mississippi, Hattiesburg, Mississippi
Armando Martínez-Cruz
California State University—Fullerton, Fullerton, California
17. Inventing a Geometry Theorem 253
Armando Martínez-Cruz
California State University—Fullerton, Fullerton, California
José N. Contreras
University of Southern Mississippi, Hattiesburg, Mississippi

18. Theorems Discovered by Students Inspire Teachers’ Development	267
Antonio Quesada <i>University of Akron, Akron, Ohio</i>	
19. Using Circle-and-Square Intersections to Engage Students in the Process of Doing Geometry	283
Stephen Blair <i>Eastern Michigan University, Ypsilanti, Michigan</i>	
Daniel Canada <i>Eastern Washington University, Cheney, Washington</i>	
20. Area Formulas with Hinged Figures	297
Alfinio Flores <i>University of Delaware, Newark, Delaware</i>	
21. An Integrated Approach to Teaching and Learning Geometry	315
David Wilson <i>State University of New York, Buffalo State College, Buffalo, New York</i>	
22. Redesigning a Traditional Geometry Lesson as an Investigative Activity	335
Jon Davis <i>Western Michigan University, Kalamazoo, Michigan</i>	
23. Looking Forward to Interactive Symbolic Geometry	349
Philip H. Todd <i>Saltire Software, Tigard, Oregon</i>	

Contents of the CD-ROM

Section I: Expanding Visions of Geometry

1. What Is Geometry?
 - Art Gallery Problem (Blackline master)
 - Folding Boxes (Blackline master)
2. Enumerating Symmetry Types of Rectangle and Frieze Patterns:
How Sherlock Might Have Done It
 - Frieze pattern worksheet 1 (Blackline master)
 - Frieze pattern worksheet 2 (Blackline master)
4. Exploring Curvature with Paper Models
 - Curvature template for figure 4.4 (Blackline master)
 - Curvature template for figure 4.6 (Blackline master)
 - Curvature template for figure 4.7 (Blackline master)
 - Curvature template for figure 4.9 (Blackline master)
 - Curvature template for figure 4.10 (Blackline master)
6. Folding Polygons to Convex Polyhedra
 - Folding a Latin cross to make a tetrahedron (Blackline master)
 - Folding a square into an octahedron (Blackline master)
 - Folding a triangle into a tetrahedron (Blackline master)

Section II: Learning Geometry

9. Conceptions of Angle: Implications for Middle School Mathematics and Beyond
 - Link to Smile Math and Logo Light
10. Developing The Spatial Operational Capacity of Young Children Using Wooden Cubes and Dynamic Simulation Software
 - Construction box (Video clip)
 - Extended construction box (Video clip)
 - Geocadabra installation
11. Fostering Geometric Thinking in the Middle Grades: Professional Development for Teachers in Grades 5–10
 - Link to Web site
 - Do Math sessions 4 and 5
 - Session 4: Dissecting Shapes (PDF)
 - Session 5: Analyze Student Work (PDF)

Section III: Teaching Geometry for Understanding

12. Teaching Geometry for Conceptual Understanding: One Teacher's Perspective
 - Law of sines worksheet (Blackline master)
13. Defining in Geometry
 - Geometer's Sketchpad files
15. Using Interactive Geometry Software to Teach Secondary School: Geometry: Implications from Research
 - Video clips
19. Using Circle-and-Square Intersections to Engage Students in the Process of Doing Geometry
 - Geometer's Sketchpad files
20. Area Formulas with Hinged Figures
 - Interactive figures
21. An Integrated Approach to Teaching and Learning Geometry
 - Mathematics 2 Course (PDF)
 - Link to Phillips Exeter Academy Web site
23. Looking Forward to Interactive Symbolic Geometry
 - Sample lessons
 - Files with Geometry Expressions reader
