# Contents

<b>Preface</b>	<b>viii</b>
<b>Acknowledgments</b>	<b>xi</b>
<b>About the Authors</b>	<b>xii</b>
 <b>PART I. PREPARING THE FOUNDATION</b>	 <b>1</b>
<b>1. What Is Visible Thinking?</b>	<b>2</b>
Understanding Mathematical Concepts	3
Thinking as a Mathematical Premise	4
Visible Thinking in Classrooms	7
Visible Thinking Scenario 1: Area and Perimeter	9
Summary	12
<b>2. How Do Students Learn Mathematics?</b>	<b>14</b>
What Is Thinking?	14
What Does Brain Research Indicate About Thinking and Learning?	15
What Is Mathematical Learning?	17
What Are Thinking and Learning Themes From Research?	19
Example Problems Revisited	21
Visible Thinking Scenario 2: Addition of Fractions	27
Summary	30
<b>3. What Is Happening to Thinking in Mathematics Classrooms?</b>	<b>31</b>
Improvement Initiatives and Visible Thinking	31
Visible Thinking Scenario 3: Subtraction With Regrouping	39
Summary	45

<b>PART II. PROMOTING VISIBLE THINKING WITH AN ALTERNATIVE INSTRUCTIONAL MODEL</b>	<b>47</b>
<b>4. How Do Effective Classrooms Depend on Visible Thinking?</b>	<b>48</b>
What Are Strategies, Conditions, and Actions?	48
Practice Into Action	50
Technology as Visible Thinking	59
Visible Thinking Scenario 4: Division	62
Summary	65
<b>5. How Are Long-Term Changes Made?</b>	<b>66</b>
Enhancing Student Learning	67
Teaching Approaches	73
Visible Thinking Scenario 5: Mixed Numerals	78
Visible Thinking Scenario 6: Place Value	82
Summary	84
<b>6. How Are Short-Term Changes Made?</b>	<b>85</b>
Pitfalls and Traps	85
Strategy Sequence	86
The Relationships Among the Strategy Sequence, Conditions, and Goals	90
Visible Thinking Scenario 7: Basic Addition and Subtraction Facts	91
Visible Thinking Scenario 8: Exponents	93
Summary	96
<b>7. How Are Lessons Designed to Achieve         Short-Term and Long-Term Changes?</b>	<b>97</b>
The Current Approach to Teaching Mathematics	97
Elements of an Alternative Instructional Model	101
Types of Problems	104
Summary	105
<b>PART III. IMPLEMENTING THE ALTERNATIVE MODEL AT DIFFERENT GRADE LEVELS</b>	<b>107</b>
<b>8. How Is Thinking Made Visible in Grades K–2 Mathematics?</b>	<b>108</b>
Brainteaser Problem Example	109
Group-Worthy Problem Example	111
Transforming Problem Example	114
Summary	116
<b>9. How Is Thinking Made Visible in Grades 3–5 Mathematics?</b>	<b>118</b>
Brainteaser Problem Example	118
Group-Worthy Problem Example	121

Transforming Problem Example	123
Summary	125
<b>10. How Is Thinking Made Visible in Grades 6–8 Mathematics?</b>	<b>127</b>
Brainteaser Problem Example	127
Group-Worthy Problem Example	130
Transforming Problem Example	133
Summary	136
<b>PART IV. CONTINUING THE WORK</b>	<b>139</b>
<b>11. How Do Teachers, Leaders, and Administrators Coordinate     Their Efforts to Improve Mathematics     Teaching and Learning?</b>	<b>140</b>
Working With Administrators	141
Embedding Lessons Into the Curriculum	144
Providing Professional Development	144
Co-planning and Co-teaching	147
Summary	148
<b>Appendix A: Research Support for Visible Thinking Strategies, Conditions, and Actions</b>	<b>149</b>
<b>Appendix B: Lessons Using Technology: Additional Materials</b>	<b>151</b>
<b>References</b>	<b>157</b>
<b>Index</b>	<b>160</b>
