

## Write for a department: **Views**

Do you have a strong opinion about a topic related to the teaching and learning of elementary school or early childhood mathematics? The News and Views department of *Teaching Children Mathematics* is seeking guest editorials for its "In My Opinion" column. The most effective submissions are provocative, forceful statements and opinions that are likely to stir fellow *TCM* readers to consider and respond to a specific viewpoint on an issue or some aspect of mathematics teaching.

Limit your submission to 750 words. Include photographs and figures at the end. Author identification should appear only on the cover page. For detailed manuscript preparation guidelines, visit <http://www.nctm.org/journal submissions/>.

### **Readers exchange**

Would you like to respond to an article in the journal? Did reading about a teaching idea inspire you to extend the activity in some way with your students? The *TCM* Editorial Panel appreciates the interest and values the views of those who take the time to send us their comments. Submit letters to the editor at [tcm@nctm.org](mailto:tcm@nctm.org). Include "Readers Exchange" in the subject line. Because of space limitations, letters and rejoinders beyond the 250-word limit are subject to abridgment. Letters are also edited for style and content.
