National Council Yearbooks!

The National Council Yearbooks are rapidly going out of print. Teachers who wish complete files and, particularly, school libraries who lack certain books should order now.—EDITOR.

GENERAL MATHEMATICS

Workbooks 1, 2, and 3 for Grades 7, 8, and 9

By WILLIAM DAVID REEVE

Teachers College, Columbia University

In these three workbooks for the junior high school the placement of each division of mathematics and the emphasis upon each follow closely the recommendations of the Joint Commission of the Mathematical Association of America and the National Council of Teachers of Mathematics in the Fifteenth Yearbook—*The Place of Mathematics in Secondary Education*.

Covering arithmetic, geometry, algebra, and trigonometry, the drills are so devised that they may be used either for teaching or for testing. They save the teacher hours of time that otherwise have to be spent in organizing proper drill material. There is a comprehensive variety in the types of exercises, and the material is ideal for emergency courses for high school pupils generally who are going into war service.

The author has had long experience as a high-school teacher, has trained hundreds of mathematics teachers in his graduate classes, and has written many successful texts.
