Answer the *once-a-year* Christmas Seal letter . . . and you make possible the *year-round* giving of health, life itself.

Your contribution will support the research, education, case-finding, and rehabilitation programs of the National Tuberculosis Association and its affiliates — which since 1904 have helped to spare almost 5,000,000 lives. Yet, TB still kills more people between the ages of 15 and 34 than any other disease.

So, please, as part of your giving this year, remember Christmas Seals.

Answer the letter that saves lives — send in your contribution, today.
