SUBJECT INDEX

Algebra/Algebraic Thinking

Algebra 1's Speed Trap. Jan. 2004, 14–16.

Building Your Own Regression Model. Apr. 2004, 284–88.

Drug Levels and Difference Equations. Nov. 2004, 266–73.

Examining Students' Reluctance to Use Graphs. Sept. 2004, 110–17.

Fairness: How to Achieve It and How to Optimize in a Fair-Division Procedure. Mar. 2004, 170–74.

Fibonacci Identities, Matrices, and Graphs. Feb. 2005, 400–403.

Identifying Features of Functions Stated in Graph Form or Equation Form. May 2004, 358–59.

Is a Triangle Determined by the Lengths of Its Three Angle Bisectors? Dec. 2004/Jan. 2005, 339–41.

Is It Always True? From Detecting Patterns to Forming Conjectures to Constructing Proofs. Feb. 2004, 96–100.

Laptops, Technology, and Algebra 1: A Case Study of an Experiment. Feb. 2004, 136–42.

Mathematical Lens. Dec. 2004/Jan. 2005, 325–26, Feb. 2005, 443–44.

Motivating Activities That Lead to Algebra. Aug. 2004, 26–31.

People Count: Analyzing a Country's Future. Jan. 2004, 58–66.

Promoting Understanding of Linear Equations with the Median-Slope Algorithm. Feb. 2005, 414–25.

Technology Tips. Sept. 2004, 136–40.

Using Simple Quadratic Equations to Estimate Equilibrium Concentrations of an Acid. Mar. 2004, 176–79.

When Two Wrongs Make a Right. Dec. 2004/Jan. 2005, 342–43.

Assessment

EMRF: Everyday Rubric Grading. Jan. 2004, 34–39.

If at First You Don't Succeed . . . Test, Test Again (Not!). May 2004, 310–12.

Calculus/Precalculus

Building Mathematical Maturity in Calculus: Teaching Implicit Differentiation through a Review of Functions. Aug. 2004, 6–12.

The Chebyshev Polynomials: Patterns and Derivation. Aug. 2004, 20–25.

Examining Students' Reluctance to Use Graphs. Sept. 2004, 110–17.

Graphing Portfolios in Calculus: Reinforcing Concepts and Inviting Creativity. Feb. 2005, 404–7.

That Ubiquitous Sum: $1 + 2 + 3 + \dots + n$. Dec. 2004/Jan. 2005, 316–21.

War and Pieces. Sept. 2004, 70–73.

Combinatorics

Combinatorial Mathematics: Research into Practice. Oct. 2004, 182–91.

Cribbage: An Excellent Exercise in Combinatorial Thinking. Apr. 2005, 519–24.

Discovering Steiner Triple Systems through Problem Solving. May 2004, 320–26.

Mathematical Lens. May 2005, 637–38.

Communication

Challenges Associated with Developing Discursive Classrooms in High-Poverty, Rural Schools. Jan. 2004, 28–31.

Focusing on Students' Mathematical Thinking. Apr. 2004, 244–47.

Projects. Apr. 2004, 303.

Computation/Arithmetic

Farey Sums and Understanding Ratios. Oct. 2004, 158–62.

Unit Fractions and Their "Basimal" Representations: Exploring Patterns. Nov. 2004, 274–84.

Connections/Applications

Copernican Mathematics: Calculating Periods and Distances of the Planets. Sept. 2004, 88–96.

Cribbage: An Excellent Exercise in Combinatorial Thinking. Apr. 2005, 519–24.

Demonstrating Boolean Logic Using Simple Electrical Circuits. Feb. 2004, 126–34.

Drug Levels and Difference Equations. Nov. 2004, 266–73.

The Galactic Spaceship Tour Challenge. May 2004, 314–19.

How Many Votes Are Needed to Be Elected President? Oct. 2004, 154–57.

Internal Rate of Return. Apr. 2005, 531–33.

Mathematical Lens. Mar. 2005, 469–71, May 2005, 637–38.

Media Clips. Jan. 2004, 54–57, Feb.

2004, 144–47, Mar. 2004, 180–83, Apr. 2004, 290–93, May 2004, 360–63, Aug. 2004, 51–53, Sept. 2004, 129–31, Oct. 2004, 172–75, Nov. 2004, 244–46, Dec. 2004/Jan. 2005, 322–24, Feb. 2005, 426–27, Mar. 2005, 476–78.

People Count: Analyzing a Country's Future. Jan. 2004, 58–66.

Pick's Theorem: What a Lemon! May 2004, 352–55.

Projects. Mar. 2005, 511.

The Triangles of Aristarchus. Apr. 2004, 228–31.

Using Simple Quadratic Equations to Estimate Equilibrium Concentrations of an Acid. Mar. 2004, 176–79.

War and Pieces. Sept. 2004, 70–73.

Curriculum

Projects. Oct. 2004, 208, Feb. 2005, 448.

Report from the Netherlands: The Dutch Revolution in Secondary School Mathematics. Feb. 2005, 374–84.

Editorial

To Include More Students, Don't Focus on Contests: Prepare for Mathematics! Feb. 2004, 84–86.

Equity and Diversity

Challenges Associated with Developing Discursive Classrooms in High-Poverty, Rural Schools. Jan. 2004, 28–31.

Function

Coloring Formulas for Growing Patterns. Mar. 2005, 472–75.

Curve Stitching: Linking Linear and Quadratic Functions. Dec. 2004/Jan. 2005, 348–57.

Fibonacci and Lucas Numbers. May 2005, 610–15.

Visualizing the Domain and Range of the Composition of Functions. Dec. 2004/Jan. 2005, 306–11.

Games and Puzzles

Constructing Cooperative Logic Problems. Feb. 2005, 386–89.

Cribbage: An Excellent Exercise in Combinatorial Thinking. Apr. 2005, 519–24.

Patterns Jumping out of a Simple Checker Puzzle. Nov. 2004, 224–27.

Geometry

Another Way to Divide a Line Segment into n Equal Parts. Feb. 2005, 428–33.

Discovering and Exploring Mandelbrot Set Points with a Graphing Calculator. Aug. 2004, 38–46.

Exploring Nonconvex, Crossed, and Degenerate Polygons. Sept. 2004, 80–86.

Exponential Growth through Pattern Exploration. Feb. 2005, 434–42.

The Extension-Reduction Strategy: Activating Prior Knowledge. Aug. 2004, 48–50.

Finding the Maximal Area of Bounded Polygons in a Circle. Mar. 2005, 491–97.

Fostering Mathematical Inquiry with Explorations of Facial Symmetry. Apr. 2004, 234–41.

Geoboard Areas: Students' Remarkable Ideas. Jan. 2004, 18–26.

High School Students' Intuitive Understandings of Geometric Transformations. Mar. 2004, 207–14.

Is a Triangle Determined by the Lengths of Its Three Angle Bisectors? Dec. 2004/Jan. 2005, 339–41.

A Journey with Circumscribable Quadrilaterals. Oct. 2004, 192–99.

Making Mathematical Connections by Constructing Tetrahedra. Dec. 2004/Jan. 2005, 298–305.

Mathematical Lens. Dec. 2004/Jan. 2005, 325–26, Mar. 2005, 469–71.

On Enlarging the Focal Point of a Parabola. May 2005, 594–98.

Pick's Theorem: What a Lemon! May 2004, 352–55.

The Power of L-systems in Fractal Construction and Theory. Mar. 2005, 459–67.

Ron's Theorem and Beyond: A True Mathematician and GSP in Action. Feb. 2004, 148–51.

Technology Tips. Jan. 2004, 68–72.

A Specific Construction of a Conic from an Ellipse. Sept. 2004, 98–103.

Tessellating the Sphere with Regular Polygons. Mar. 2004, 165–67.

The Triangles of Aristarchus. Apr. 2004, 228–31.

Using Geometry Software to Revisit the Ellipse. Mar. 2004, 184–91.

Using Overhead Projectors to Explore Size Change Transformations. Mar. 2005, 498–507.

When Two Wrongs Make a Right. Dec. 2004/Jan. 2005, 342–43.

History

Benjamin Banneker and the Law of Sines. Feb. 2005, 390–93.

New Worlds to Conquer. Oct. 2004, 166–70.

War and Pieces. Sept. 2004, 70–73.

Home/Community/Business Relations

Projects. Mar. 2004, 223.

International Perspective

Report from the Netherlands: The Dutch Revolution in Secondary School Mathematics. Feb. 2005, 374–84.

Measurement

What Do You See? A Case for Examining Students' Work. Feb. 2004, 102–5.

Modeling

How Fair Is the Drug Test? Apr. 2005, 536–43.

How Many Votes Are Needed to Be Elected President? Oct. 2004, 154–57.

Number Sense

Including Leap Year in the Canonical Birthday Problem. Feb. 2004, 87–89.

The Legacy of Marin Mersenne: The Search for Primal Order and the Mentoring of Young Minds. Apr. 2005, 525–30.

Mathematical Lens. Mar. 2005, 469–71.

Number System

Reducing the Sum of Two Fractions. Mar. 2005, 486–90.

Why Is the $\sqrt{25}$ Not ± 5 ? Jan. 2004, 12–13.

Number Theory

Fibonacci and Related Sequences. Feb. 2004, 116–19.

Multiplying Everything Using the Difference of Two Squares. Apr. 2005, 550–56.

New Worlds to Conquer. Oct. 2004, 166–70.

Reducing the Sum of Two Fractions. Mar. 2005, 486–90.

Patterns

- The Chebyshev Polynomials: Patterns and Derivation. Aug. 2004, 20–25.
- Developing Mathematical Power by Using Explicit and Recursive Reasoning. Nov. 2004, 216–23.
- Fractal Patterns and Chaos Games. Nov. 2004, 228–33.
- How Fair Is the Drug Test? Apr. 2005, 536–43.
- Kaprekar's Constant. Nov. 2004, 234–42.
- Mathematical Lens. Feb. 2005, 443–44.
- Multiplying Everything Using the Difference of Two Squares. Apr. 2005, 550–56.
- Pattern Busting. Nov. 2004, 254–59.
- Patterns in Perfect Squares: An Activity for Exploring Mathematical Connections. Nov. 2004, 260–65.
- Placing a Deck of Cards in Order. Dec. 2004/Jan. 2005, 312–15.
- Unit Fractions and Their “Basimal” Representations: Exploring Patterns. Nov. 2004, 274–84.

Probability

- Discovering Steiner Triple Systems through Problem Solving. May 2004, 320–26.
- Fairness: How to Achieve It and How to Optimize in a Fair-Division Procedure. Mar. 2004, 170–74.
- Teaching Probability and Statistics Using Game Shows. Apr. 2005, 564–70.
- Tennis, Anyone? May 2005, 586–92.

Problem Solving

- Calendar. Jan. 2004, 40–46, Feb. 2004, 120–25, Mar. 2004, 192–97, Apr. 2004, 264–68, May 2004, 344–49, Aug. 2004, 32–37, Sept. 2004, 104–9, Oct. 2004, 176–81, Nov. 2004, 248–53, Dec. 2004, Dec. 2004/Jan. 2005, 327, 330–33, Jan. 2005, Dec. 2004/Jan. 2005, 328–29, 334–36, Feb. 2005, 408–13, Mar. 2005, 480–85, Apr. 2005, 544–49, May 2005, 616–21.
- Deciding when to Use the Harmonic or Arithmetic Mean. May 2005, 626–36.
- Discover Mathematical Knowledge through Recreational Mathematics Problems. Apr. 2004, 258–63.
- The Extension-Reduction Strategy: Activating Prior Knowledge. Aug. 2004, 48–50.

- Including Leap Year in the Canonical Birthday Problem. Feb. 2004, 87–89.
- In-Depth Mathematical Analysis of Ordinary High School Problems. Apr. 2004, 248–55.
- Kaprekar's Constant. Nov. 2004, 234–42.
- Managing Returns in a Catalog Distribution Center. Sept. 2004, 118–28.
- Note: Figures Not Drawn to Scale. Sept. 2004, 74–78.
- A Primer for Preproblem Ponderings: Anticipating the Answer. Feb. 2004, 110–15.
- That Ubiquitous Sum: $1 + 2 + 3 + \dots + n$. Dec. 2004/Jan. 2005, 316–21.
- Using Proportional Reasoning to Solve Geometric Problems. Aug. 2004, 16–19.

Reasoning

- Constructing Cooperative Logic Problems. Feb. 2005, 386–89.
- Demonstrating Boolean Logic Using Simple Electrical Circuits. Feb. 2004, 126–34.
- Focusing on Students' Mathematical Thinking. Apr. 2004, 244–47.
- Is It Always True? From Detecting Patterns to Forming Conjectures to Constructing Proofs. Feb. 2004, 96–100.
- Using Conjectures to Teach Students the Role of Proof. Jan. 2004, 48–52.
- Using Proportional Reasoning to Solve Geometric Problems. Aug. 2004, 16–19.

Research

- Action Research: A Tool for Exploring Change. May 2004, 366–70.
- Combinatorial Mathematics: Research into Practice. Oct. 2004, 182–91.

Statistics/Data Analysis

- A-B-C, 1-2-3. Apr. 2004, 270–82.
- Deciding when to Use the Harmonic or Arithmetic Mean. May 2005, 626–36.
- Mathematical Lens. Aug. 2004, 13–14, Sept. 2004, 132–34, Oct. 2004, 164–65, Nov. 2004, 285–86, Apr. 2005, 557–59.
- Media Clips. Jan. 2004, 54–57, Feb. 2004, 144–47, Mar. 2004, 180–83, Apr. 2004, 290–93, May 2004, 360–63, Aug. 2004, 51–53, Sept. 2004, 129–31, Oct. 2004, 172–75, Nov. 2004, 244–46, Dec. 2004/Jan.

- 2005, 322–24, Feb. 2005, 426–27, Mar. 2005, 476–78, Apr. 2005, 534–35, May 2005, 644–46.
- Projects. May 2005, 641.
- Technology Tips. Aug. 2004, 56–60.
- Using Graphing Calculators to Model Real-World Data. May 2004, 328–42.
- Using Research Projects to Help Develop High School Students' Statistical Thinking. Feb. 2004, 106–9.

Teachers

- Challenges Associated with Developing Discursive Classrooms in High-Poverty, Rural Schools. Jan. 2004, 28–31.
- A Highly Qualified Mathematics Teacher in Every Classroom by 2005–2006: Blueprint or Fantasy? Jan. 2004, 4–5.
- A Proposal to Address the Shortage of Highly Qualified Mathematics Teachers. Mar. 2005, 456–58.
- Providing Meaningful Fieldwork for Preservice Mathematics Teachers: A College-School Collaboration. May 2005, 599–604.
- Recruiting Mathematics Teachers: Strategies to Consider. Feb. 2004, 92–95.

Teaching

- Action Research: A Tool for Exploring Change. May 2004, 366–70.
- Algebra 1's Speed Trap. Jan. 2004, 14–16.
- Focusing on Students' Mathematical Thinking. Apr. 2004, 244–47.
- Fostering Mathematical Inquiry with Explorations of Facial Symmetry. Apr. 2004, 234–41.
- The Galactic Spaceship Tour Challenge. May 2004, 314–19.
- Geoboard Areas: Students' Remarkable Ideas. Jan. 2004, 18–26.
- How the Nation's Largest School System Is Managing One of Its Severest Math Teacher Shortages. May 2005, 582–84.
- If at First You Don't Succeed . . . Test, Test Again (Not!). May 2004, 310–12.
- The Legacy of Marin Mersenne: The Search for Primal Order and the Mentoring of Young Minds. Apr. 2005, 525–30.
- Pick's Theorem: What a Lemon! May 2004, 352–55.

Promoting Learning through Inquiry. Jan. 2004, 6–11.

Ron's Theorem and Beyond: A True Mathematician and GSP in Action. Feb. 2004, 148–51.

Technology Tips. Feb. 2004, 152–55, Apr. 2004, 294–98, May 2004, 372–78.

Using Conjectures to Teach Students the Role of Proof. Jan. 2004, 48–52.

Using Overhead Projectors to Explore Size Change Transformations. Mar. 2005, 498–507.

Using Research Projects to Help Develop High School Students' Statistical Thinking. Feb. 2004, 106–9.

What Do You See? A Case for Examining Students' Work. Feb. 2004, 102–5.

Technology

A-B-C, 1-2-3. Apr. 2004, 270–82.

Building Your Own Regression Model.

Apr. 2004, 284–88.

The Constant Feature: Spanning K–12 Mathematics. Mar. 2004, 198–204.

Discovering and Exploring Mandelbrot Set Points with a Graphing Calculator. Aug. 2004, 38–46.

Exploring Nonconvex, Crossed, and Degenerate Polygons. Sept. 2004, 80–86.

Graphing Portfolios in Calculus: Reinforcing Concepts and Inviting Creativity. Feb. 2005, 404–7.

Laptops, Technology, and Algebra 1: A Case Study of an Experiment. Feb. 2004, 136–42.

The Power of L-systems in Fractal Construction and Theory. Mar. 2005, 459–67.

Projects. Jan. 2004, 79, Feb. 2004, 158–59, Mar. 2004, 223, Apr. 2004, 303, Feb. 2005, 448, May 2005, 641.

Promoting Problem Solving across Geometry and Algebra by Using Technology. May 2005, 605–9.

Promoting Understanding of Linear Equations with the Median-Slope Algorithm. Feb. 2005, 414–25.

Ron's Theorem and Beyond: A True Mathematician and GSP in Action. Feb. 2004, 148–51.

A Specific Construction of a Conic from an Ellipse. Sept. 2004, 98–103.

Teaching Probability and Statistics Using Game Shows. Apr. 2005, 564–70.

Technology Tips. Jan. 2004, 68–72, Feb. 2004, 152–55, Apr. 2004, 294–98, May 2004, 372–78, Aug. 2004, 56–60, Sept. 2004, 136–40, Oct. 2004, 200–204, Dec. 2004/Jan. 2005, 344–47, Feb. 2005, 394–98, Apr. 2005, 560–63, May 2005, 622–25.

Using Graphing Calculators to Model Real-World Data. May 2004, 328–42.

Using Overhead Projectors to Explore Size Change Transformations. Mar. 2005, 498–507. ∞

SHARE YOUR ACTIVITIES

Do you have an idea for a mathematics activity that might interest young mathematics students? Is it within the reach of bright fifth-graders? Can it be extended to challenge sophomores or juniors in high school?

The Editorial Panel of *Student Math Notes* is seeking manuscripts to include in future issues. Please share your ideas with the audience of *Student Math Notes*. We know that mathematics students respond to these interesting and challenging activities.

What should you do? Put your ideas on paper, and send them to NCTM, where they will be directed to the Editorial Panel of *Student Math Notes*. The panel considers all manuscripts received. If a manuscript has good potential, the panel puts it in final form. You will not have to do any rewriting; the panel takes your idea and develops it into a publishable article, but you get the credit.

Send your ideas or articles to NCTM, *Student Math Notes*, 1906 Association Drive, Reston, VA 20191-1502.
