

Problem Solvers has become **Problem** of the **Month**

MT's Problem Solvers department is now the Problem of the Month, found in the Calendar.

These nonroutine, fun problems invite multiple approaches and provide opportunities for individual students or math clubs to demonstrate creativity. Send in your students' solutions—*MT* will celebrate your students' accomplishments by publishing work that represent a range of strategies. You may submit your student solutions directly to the Problem Solvers editors: Séan Madden, smadden@greeleyschools.org, and Ricardo Diaz, Ricardo.diaz@unco.edu. Students with correct solutions will be acknowledged in the journal.

Or, if you have a great problem to share, send it to the Problem Solvers editors anytime! Note that problems submitted to this department should be limited to 60 words (or fewer if there is an accompanying diagram).
