**What Did You Do in School Today?**

“What did you do in school today?” is a common question that parents ask their children when they arrive home in the afternoon or over the family meal. The TCM Editorial Panel would like to ask teachers a similar question: “What happened in your mathematics class today?”

The diverse viewpoints and experiences of classroom teachers make TCM a valuable resource for all readers. Add your unique contribution to the mix! You might have a story to tell about a classroom situation that taught you a great deal about teaching mathematics. Share your story so that others can learn.

The TCM “Writer’s Packet” has tips for preparing manuscripts, information about TCM’s departments, and information and guidelines for contributors. The guidelines spell out the average length of a manuscript, how to include photographs and figures, the uses of resources and quotations, and other procedural information. View the packet online at my.nctm.org/eresources/submission_tcm.asp.
