

## CALL FOR MANUSCRIPTS

CARMEN S. BROWN

### “early childhood corner”

Tell us how you support our youngest mathematicians. How do you—

- create environments that support mathematical thinking;
- engage young children in projects that invite such thinking as well as problem solving;
- help your students connect the mathematics of play to other mathematical applications;
- design activities that allow preschoolers to practice mathematical thinking; and
- celebrate mathematics and young mathematicians in your classroom?

The *Teaching Children Mathematics* Editorial Panel would like to hear about your efforts and celebrate your students' experiences with you. Submit articles online at [tcm.msubmit.net](http://tcm.msubmit.net). Find department submission guidelines, tips, and mentoring at [www.nctm.org/tcmdepartments](http://www.nctm.org/tcmdepartments).
