Culturally Responsive

Culturally Responsive Pedagogy is...

Some of the characteristics of culturally responsive teaching are:

1. *Positive perspectives on parents and families*
2. *Communication of high expectations*
3. *Learning within the context of culture*
4. *Student-centered instruction*
5. *Culturally mediated instruction*
6. *Reshaping the curriculum*
7. *Teacher as facilitator*

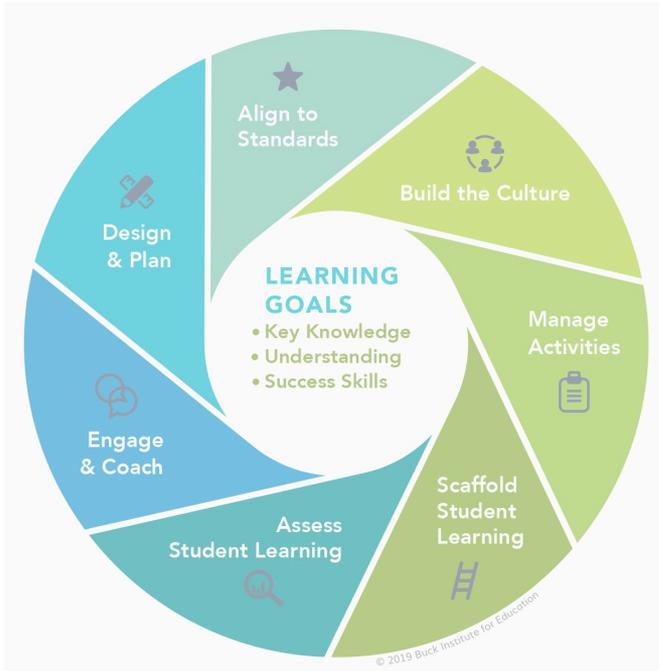

3

PBL (Project Based Learning)

Project-based learning is...

A teaching method in which students learn by actively engaging in real-world and personally meaningful projects. (pblworks.org)

Hunger

How can we impact hunger in our community?

Poverty

How can we change the poverty situation in our city?

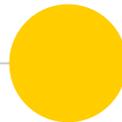

2

Experiential Learning

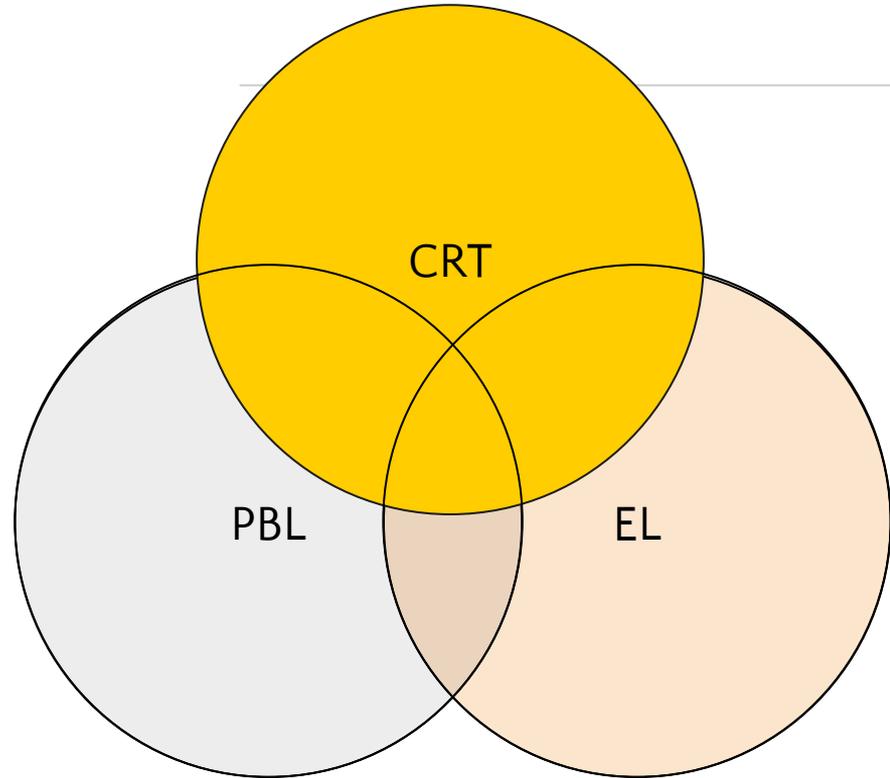

Experiential learning is...

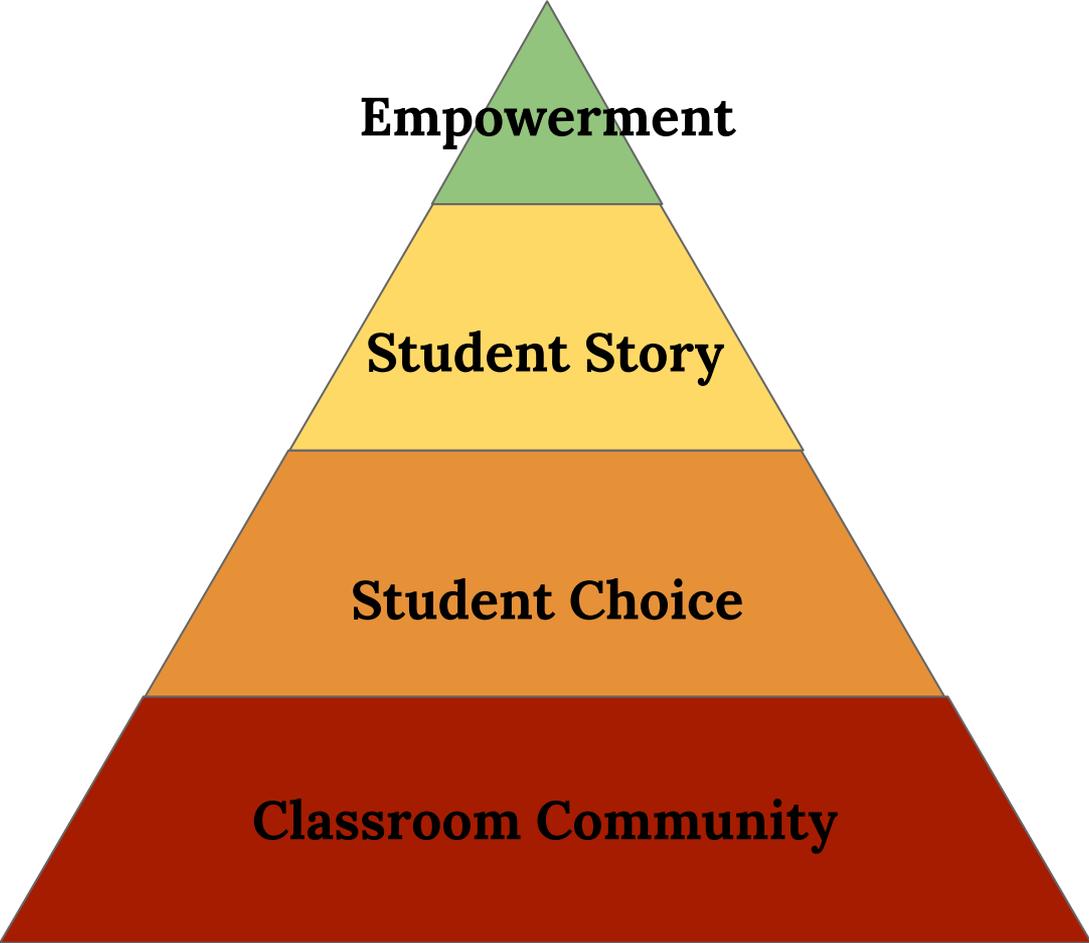

- The application of theory and academic content to **real-world experiences**, either within the classroom, within the community, or or within the workplace, ...Experiential learning requires the student to not only **engage in the experience activity**, but also requires them to reflect upon their learning and how their skills learned through their academic studies can be applied beyond the classroom. (Carleton)
- Experiential learning is, quite simply, **learning by doing**. (experientiallearning.org)
- **...building knowledge by doing**. Experiential learning can refer to simulations, role plays, project-based learning, or any other immersive educational experience. four stages: action, reflection, conceptualization, and application. (edutopia)

How can Project Based & Experiential Learning support a Culturally Responsive Teaching practice?

Phase Three:

Empowerment

Phase Two:

Student Story

Phase One:

Student Choice

Phase Zero:

Classroom Community

Phase Zero: Classroom Community

- How do you create a safe environment for students to take intellectual risks?
- How do you build, maintain, sustain & repair meaningful relationships with your students?

Phase Zero: Classroom Community

- How do you create a safe environment for students to take intellectual risks?
- How do you build, maintain, sustain & repair meaningful relationships with your students?

Phase One: Student Choice

- What choices do students make in your math classroom?
- What opportunities for choice can you invite?

Phase One: Student Choice

- What choices do students make in your math classroom?
- What opportunities for choice can you invite?

Phase Two: Student Story...

- What stories are told in your math classroom?
- **Whose** stories are shared in your classroom?

Image credit: Howie Hua

Phase Two: Student Story...

- What stories are told in your math classroom?
- **Whose** stories are shared in your classroom?

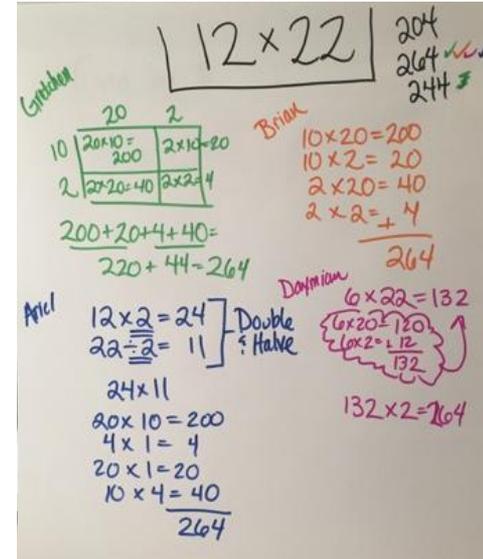

Image credit: Howie Hua

Phase Two: ...and Ownership

- How are the mathematical ideas of students shared & uplifted within your classroom community?

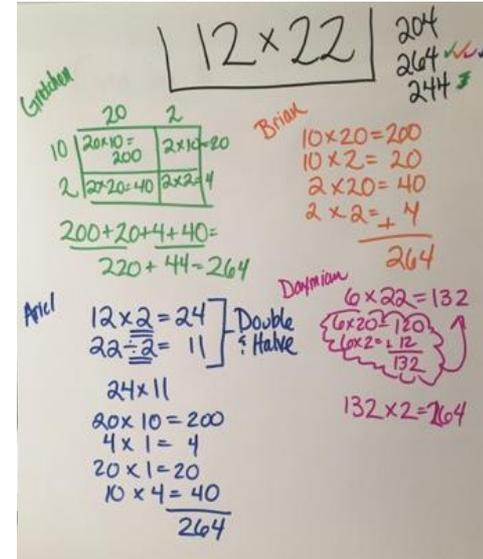

Phase Two: ...and Ownership

- How are the mathematical ideas of students shared & uplifted within your classroom community?

Phase Three: Empowerment

- In what ways does math help *illuminate*, *edify* and *seek solutions* for problems facing our society?
- In what ways does math *replicate*, *amplify* and *exacerbate* these issues?

Phase Three: Empowerment

- In what ways does math help *illuminate*, *edify* and *seek solutions* for problems facing our society?
- In what ways does math *replicate*, *amplify* and *exacerbate* these issues?

Recommendations About PBL & EL

- ◉ Begin with a culture of inquiry and collaboration
- ◉ If you want to implement Project Based Learning, you've got to start somewhere, so just start!
 - Start with the math
 - Start with something you enjoy
 - Then, look at what your students are interested in
- ◉ Keep things open-ended: if it's not open, then "it's not a project; it's a recipe."
- ◉ Talk with your colleagues

Call to Action

What **commitment** will you make moving forward from here?

All teaching is culturally responsive teaching. The question is to whose culture you are responding.

-Zaretta Hammond
