June 19, 2017

Dear Representatives Frelinghuysen, Lowey, Cole, and DeLauro:

The undersigned organizations on behalf of the Title IV, A Coalition write to request that the Committee provide full funding for the Student Support and Academic Enrichment (SSAE) grant program, found under Title IV, Part A of the bipartisan Every Student Succeeds Act (ESSA).

The SSAE grant program, authorized at $1.6 billion for fiscal year 2018 (FY 2018), is the result of Congress’ decision to consolidate more than 20 existing programs, most of which were competitive, into a single formula-funded flexible block grant program that has the potential to benefit millions of students by allowing districts to choose how to spend their dollars to support safe and healthy schools, well-rounded education, and the effective use of technology. The critical education programs meant to be supported by SSAE funds include: 1) safe and healthy students activities, such as providing mental health services to students; 2) increasing student access to STEM, computer science and accelerated learning courses, physical education, the arts, music, foreign languages, and college and career counseling; funds for an effective school library program; and, 3) providing students with access to technology and digital materials and educators with technology professional development opportunities.

We strongly urge Congress to fully fund the SSAE program in FY 2018, as the FY 2017 allocation of only $400 million is wholly inadequate to provide the flexibility at the local level or to run the program as Congress intended. Funding this program at less than 25% of its authorized level in its first year has already presented serious implementation issues, including the need to allow states to allocate funds to districts competitively, contrary to what is authorized in ESSA. States electing to run a competition will incur significant burdens as they grapple with creating, initiating, and judging a competition. Altering the structure of the program in this manner also negates the Congressional
intent of increasing access to SSAE programs for all students and instead is likely to continue to benefit those districts already adept at winning competitive grants.

As a result of the low funding and the confusion around a competition, we are deeply concerned that many states might ignore the competitive option altogether and choose to allocate the money by formula for the sake of ease and fairness to all districts. While our groups ultimately want these dollars to go to every district, electing to distribute the money by formula at this low funding level has its own potentially negative consequences. For instance, many states or districts might choose to simply transfer the dollars for another purpose, as the amounts received by formula may simply not be enough to make meaningful investments in these areas, thereby leaving districts with no federal funds to support Title IVA’s abovementioned activities.

In addition to the financial challenges of such a low funding level, the amount allocated for SSAE does not allow states and districts to make meaningful investments in a range of programs that, when combined, improve conditions for learning and help students receive a well-rounded education. It will force school districts to choose between high-quality programs that positively impact students in different ways – trading off school counseling services for Advanced Placement programs, for instance, thereby jeopardizing the greater flexibility for districts and schools that Congress intended.

On behalf of the millions of students, parents and educators that we collectively represent, we urge you to please appropriate full funding in FY 2018 for the Student Support and Academic Enrichment grant program under Title IV, A of ESSA and allow states and districts to make meaningful investments in programs that are critical to student success.

Sincerely,
